EDUCATION

-
- Bharati Vidyapeeth College of Engineering** Pune, India
 - Bachelor of Technology - Electronics and Communication; GPA: 9.5* October 2020 - June 2024
 - Courses: VLSI, Microcontrollers, Operating Systems, Data Structures,, Artificial Intelligence, Machine Learning, Fuzzy Logic, Databases, Optical Network*

SKILLS SUMMARY

-
- Languages:** Python, SQL, Java
 - Tools:** Snowflake,PySpark, DBT, TWS Scheduler, Azure, GIT
 - Platforms:** DataBricks, Linux, Azure Cloud
 - Soft Skills:** Leadership, Event Management

EXPERIENCE

-
- Amdocs** Pune, India
- Data Engineer (Full-time)* Sep 2024 - Currently
- ETL Pipelines:** Designed and developed end-to-end ETL pipelines using SnowSQL, Snowflake CTL files, and automated workflow components, ensuring reliable and scalable data ingestion.
 - Scheduling:** Built and scheduled enterprise jobs using TWS Scheduler (IBM Workload Scheduler), improving operational efficiency and on-time delivery of data pipelines.
 - Scripting:** Developed Linux (ksh) and Python automation scripts to streamline data engineering tasks, including file transfers, monitoring, and data validation.
 - Wrappers:** Built secure SFTP wrapper scripts to transfer files from Linux grid servers to Azure Blob Containers, enabling cloud-based analytics and storage integration.
 - Data Quality:** Engineered a Data Quality Validation Framework in Python to compare datasets across Snowflake and Vertica (up to 75,000 records), generating column-wise Excel reports for audit and analysis.
 - Monitoring report:** Created a ksh monitoring script to capture schedule status (start time, end time, runtime, success/failure), and automated execution via Conman, ensuring daily operational visibility for the entire team.
 - Audits:** Engineered auditing python program to fetch data from file and parallelly from the table to generate a dynamic comparison report which includes passed or failed coloring based variance criteria in each column.
 - Automation:** Designed and built automation to download mappings and sessions in form of XMLs from Informatica Powercenter which can download mappings across all folders parallelly from the selected repository and can compile the folder into zip and send as a mail from VM, reducing 100% of manual work and is more than 90% efficient.
 - Data Handling:** Collaborated across data engineering and operations teams to troubleshoot pipeline issues, improve reliability, and optimize workflows.Enhanced end-to-end pipeline efficiency by leveraging Snowflake, Vertica, Azure Cloud, Linux scripting, and Python, contributing to improved data quality and operational automation.

PROJECTS

-
- Enterprise Sales Data Warehouse:** Built an end-to-end ELT data warehouse using dbt and Snowflake, transforming raw sales data through staging, intermediate, and dimensional/fact layers. Implemented incremental processing for order data, dbt snapshots for historical tracking, source freshness monitoring, reusable macros, and data quality tests for nulls, uniqueness, referential integrity, and business rules. Tech: Snowflake, dbt, SQL
 - Edge Computing:** Developed models which are helpful in the management of an edge computing server network. There are animation and GUI options which are indispensable in simulation modelling. Tech: Python, Salabim, SimPY
 - Spring Rest API with React:** This Spring Boot application serves as a REST API for course management. Components include controllers, services, entities, and data access objects (DAOs). Tech: JAVA, Spring Boot, REST API, MYSQL, REACT JS

CERTIFICATIONS

-
- Databricks Certified Data Engineer Associate
 - Azure AI Fundamentals - AI 900
 - Microsoft Certified: Azure Databricks Data Engineer Associate

LEADERSHIP EXPERIENCE

-
- Secretary at Rotaract Club of Bharati Vidyapeeth COEP** Pune, India
 - Organised various social events and sessions to motivate students.* 2023 - 2024
